SUMMARY

DevOps Engineer with 2.5 years of experience building and scaling cloud-native platforms on Azure (AKS) and AWS (EKS). Specialized in Kubernetes, Terraform, and CI/CD automation, with proven impact in reducing incidents by 33% and improving deployment efficiency by 60%. Experienced in designing scalable, reliable, and production-grade infrastructure systems across multi-cloud environments.

PROFESSIONAL EXPERIENCE

DevOps Engineer

AWAN Infotech

Dec 2023 – Present

📍 Chennai, India

Project: SIEMply Secure

- Architected and provisioned scalable AKS/EKS infrastructure using Terraform modules, reducing manual provisioning effort by 60% and improving deployment consistency.
- Designed and implemented CI/CD pipelines using GitHub Actions for multi-environment deployments, enabling faster and reliable application releases.
- Developed reusable Helm charts, standardizing microservice deployments and reducing release cycle time.
- Strengthened cluster security by implementing Traefik ingress, cert-manager (Let's Encrypt), and RBAC policies for secure service exposure.
- Automated Kubernetes cluster lifecycle management, including upgrades, patching, and rollouts, using PowerShell scripts to minimize downtime.

Project: Ivanti Service Manager

- Automated service deployment, log retention, and security patching across 1000+ Windows Servers using PowerShell remoting, reducing manual provisioning time by 80%.
- Led migration of legacy VM workloads to Azure Kubernetes Service (AKS), achieving zero-downtime deployments with robust monitoring strategies.
- Engineered observability for 1000+ Windows/Linux VMs using New Relic APM & Infrastructure, improving system visibility across multi-region environments.
- Designed NRQL-based dashboards and alerting systems, reducing false-positive incidents by 33% and accelerating incident response time.
- Managed 20+ production Kubernetes clusters, ensuring high availability through performance tuning and proactive issue resolution.

CERTIFICATIONS

Certified Kubernetes Administrator (CKA)

Credly Badge: credly.com/badges/9ee43339-e57e-4a22-9a57-9df418aa4ba8

Aug 2025 – Aug 2027

PROJECTS

- **Traefik Ingress Migration for AKS** – Migrated ingress architecture from NGINX to Traefik in AKS for secure and scalable traffic routing.
- **Production-Grade AKS Terraform Modules** – Developed reusable Terraform modules for automated AKS infrastructure provisioning.

SKILLS

Cloud: Azure (AKS, VNet, Key Vault, Managed Identities, Storage accounts), AWS (EC2, S3, VPC, ECR, ECS, EKS)

Containers & Orchestration: Kubernetes, Docker, Helm, container lifecycle management

CI/CD: GitHub Actions, Jenkins, Azure DevOps, multi-environment pipeline design

Infrastructure as Code: Terraform

Scripting: PowerShell, Python

OS: Windows, Linux

Version Control: Git

Security & Networking: Traefik, NGINX, mTLS, RBAC, Secrets Management, cert-manager

Monitoring & Observability: Prometheus, Grafana, New Relic (APM & Infrastructure), NRQL

EDUCATION

B.E. in Computer Science

Loyola Institute of Technology — CGPA: 7.63

2019 – 2023

📍 Chennai, India

LANGUAGES

Tamil, English
